

7-DAY PROP FIRM CHALLENGE KIT

\$29 companion | Printable tracker + daily caps

A one-week execution sheet for funded-account evaluations.

Daily profit caps, consistency math, red-day rules, and a fill-in tracker.

Use it standalone, or upgrade to Premium Quant for the live dashboard tracker, planning engines, academy, and Quant Protocol on TradeLocker Desktop.

THE RULES THAT ACTUALLY FAIL ACCOUNTS

- Consistency: best profitable day / total profit must stay at or under ~20% on most firms. One hero day fails the challenge.
- Daily loss: treat 5% as a hard stop unless your firm is stricter. Two losses in a row ends the session.
- Risk per trade: 0.4-1.0% of account. Never size for boredom.
- Profit caps: bank the day at the cap. Leaving winners on the table is how you stay consistent.
- One market, one plan. Switching instruments mid-session is usually tilt.
- This kit assumes a typical 8-10% target. Always verify YOUR firm's live rules before you trade.
- No strategy guarantees a pass. This is process, not a promise.

Quick math (8% in 7 sessions)

Average needed ~ 1.15%/day if every day is green (it won't be).

Plan caps of ~1.1-1.5% so no single day becomes 20%+ of the total.

Example fail: +4% day 1 then grind +4% more -> best day is 50% of profit. Failed.

DAILY EXECUTION

DAY 1 - Foundation & First Strike

Cap +1.5% | Risk 0.75% / trade | 2 trades

- Mark HTF bias, liquidity, and session open on one market (XAUUSD or NAS100).
- Only A+ setups. Stop the session at +1.5% even if more setups appear.
- Screenshot plan (bias, invalidation, R:R) before you click.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAY 2 - Controlled Build

Cap +1.4% | Risk 0.75% / trade | 2 trades

- One lesson from yesterday's journal (timing or stop).
- If day 1 was a full cap day, size down ~10%.
- Recalc consistency: best day / total profit. Start managing the 20% rule.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAILY EXECUTION

DAY 3 - Midweek Balance

Cap +1.3% | Risk 0.50% / trade | 2 trades

- Only trade if session bias matches your plan.
- No hero trades. Even distribution beats one spike.
- Two losses in a row = session over.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAY 4 - Protect the Curve

Cap +1.2% | Risk 0.50% / trade | 2 trades

- If consistency is tight, take smaller wins and stop early.
- Skip the session if the book is messy - skipping is a valid day.
- Log every scratch. Process > P&L today.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAILY EXECUTION

DAY 5 - Selective Pressure

Cap +1.2% | Risk 0.50% / trade | 2 trades

- One market only. No revenge after a red open.
- If already near target pace, protect daily loss first.
- Audit: are you trading the plan or boredom?

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAY 6 - Finish Approach

Cap +1.1% | Risk 0.40% / trade | 2 trades

- Do not need a hero day to finish. Spread the last 1-2%.
- If best day is already large, you cannot add a bigger green day.
- Prep tomorrow's 'no new risk if target hit' rule.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

DAILY EXECUTION

DAY 7 - Close Clean

Cap Fill the gap only | Risk 0.40% / trade | 1-2 trades

- If target is hit, stop. Do not give it back.
- If short, take only A+ to close the gap - never all-in.
- Export journal. Review consistency math before you submit.

P&L today: _____ Running total: _____ Best day: _____

Consistency % (best / total): _____ Session end reason: _____

7-DAY TRACKER (PRINT THIS)

Day	Cap	P&L %	Trades	Best?	Notes
1					
2					
3					
4					
5					
6					
7					

End-of-week audit

Total profit %: _____ Best single day %: _____
Consistency (best / total x 100): _____ (must be <= your firm's rule)
Daily loss breaches: _____ Plan followed? Y / N
If not passed: what broke - sizing, tilt, hero day, or no setups?

WHEN YOU WANT THE FULL STACK

This kit is the paper system. Premium Quant (\$149.99/mo) unlocks:

- Interactive 7-day tracker in the dashboard + day-complete emails
- Planning engines (risk, survival sims, confluence, more)
- Chart Academy + live terminal tools
- 1-on-1 guidance
- Quant Protocol on TradeLocker Desktop (not web)
